

SIT323/SIT737- Cloud Native Application Development

11.1HD: Delivering a cloud-native application

Overview

In this task, you are going to deliver the application that you planned to implement in Week 4 (4.3HD).

Steps

- Prepare a 2-minute video showcasing your project (YouTube or streams).
- A series of screenshots of the current state of your application.
- Worklog based on your weekly plan.
- Prepare a few PowerPoint slides and to demo the application to the Unit chair.
- Make sure you have booked a meeting with unit chair for Week 11. (available time slots will be announced in Week 10 via Microsoft Teams)
- Provide the link to your Git repository containing all relevant code and files.

Submission Details

Submit a PDF containing:

- The link to your showcase video
- Presentation slides
- Screenshots of your project progress
- Work logs detailing the project timeline
- Any additional information (e.g., project documentation, descriptions) supporting your work.
