8.2HD- SIT323/SIT737- Cloud Native Application Development
Updating development plan & timeline

This task has two sections:

1. **Project Progress Update**
2. **Updated Project Plan** (only if changes were made since Task 4.3HD)

In the first section, you must provide a one-page update showing the current state of your project. This should include brief evidence of your development progress—such as screenshots of key stages—as aligned with your original plan submitted for Task 4.3HD. Keep this section concise; exceeding one page may result in a request for resubmission.

The second section is only required if you have made changes to your original plan. If so, you must clearly outline the updates and provide the revised plan and timeline

Submission Details

Submit a single PDF file that includes both sections. The total submission must not exceed two pages.
